

Dear sponsors:

May God continue to bless you and keep you from wrong and danger. I am doing well. My mother still gets pain in her joints; we have had to take her to the hospital. However, she is a little better now but she gets depressed because of her illness. My sister Andrea, my brother David, my mother and my grandmother's birthday's are in March. God has given them one more year of living.

Things have changed in regards to school because now we have to put more effort in our studies. The school changed professors and classrooms. We now have to walk a little longer to get to school so when my brothers and I enter the classrooms we feel very hot. I have learned new things at school and I am putting them into practice.

I am going to be praying for you and for all your family. May God continue to bless you and keep you!

Sincerely,

Kevin.
